PUMP MOUNTED MANUAL DETENTED
3-Position, 4-Way Tandem Center Valve
With "B" Port Pressure Control and Release System.
(2.15 to 1 Ration Ref.)

FUNCTION

Center Position:

"A" and "B" Ports blocked
"Pressure" Port to tank

"A" Position:

Pressure to "A" Port
"B" Port to tank

"B" Position:

Pressure to "B" Port (controlled to 6400 PSI max.) "A" Port to hold until pressure ratio is obtained and then releases to tank. "A" Port will remain open as long as "B" Port maintains pressure ratio.

NOTE: "A" Port is blocked with "B" and "P" Ports open to tank during transition between valve positions. Pressure ratio is the pressure differential in the "A" and "B" Ports.

Refer to any operating instructions included with this product for detailed information about operation, testing, disassembly, reassembly, and preventive maintenance.

Items found in this parts list have been carefully tested and selected. **Therefore: Use only genuine replacement parts!**
